American Bridge Co., Dunn Low Bidders On First Shasta Railway Relocation Job

SACRAMENTO, July 11.—Low bids aggregating approximately \$742,000 were submitted to the U. S. Bureau of Reclamation today for construction of the Southern Pacific railway bridge across the Sacramento river at Redding.

First unit of the permanent Southern Pacific relocation around the site of Shasta reservoir, the bridge contracts attracted bids from 23 concerns.

Clifford A. Dunn of Klamath Falls, Oregon, at \$173,120 was low bidder on Schedule 1, covering construction of reinforced concrete piers and abutments.

American Bridge Low

For the superstructure, including furnishing and erecting the steelwork, constructing a timber deck and laying track, the lowest figure was submitted by American Bridge Co. of Pittsburgh, Pa. The firm, a U. S. Steel subsidiary and affiliate of the Columbia Steel Co. of San Francisco, offered to perform the contract for \$569,100 if fabricated steel is accepted at the shipping point, probably Gary, Indiana, and shipped on government bill of lading.

Close second bidder for this portion of the work was Wisconsin Bridge & Iron, Milwaukee, with a proposal of \$590,875 if steel is shipped on government bill of lading. In view of the close bidding, official announcement of the low bid was withheld pending final computation of freight rates from both the bidder's shipping points.

Bates & Rogers Second

Second low bidder for piers and abutments. Schedule 1, was Bates & Rogers Construction Company of Oakland, at \$175,863.

The bridge when completed will have a total length of 4,346 feet. It will be built on a curve from Redding toward the foothills.

While bids were being opened here today, work already was underway at Shasta Dam site on the diversion tunnel and temporary railroad relocation through the west abutment. Colonial Construction Co. forces last week set off the first blasts. The tunnel will take about four months to complete.

ASK BIDS SOON ON PRADO DAM, BASIN PROJECT

Plans for the Prado Dam and retarding basin on the Santa Ana River have been approved by Federal officials, and bids on the job will be called within the next few weeks, according to Major Theodore Wyman, Jr., District Engineer of the U. S. Engineer Office, Los Angeles.

The Prado Retarding Basin will involve an earth-fill dam, having an impervious core, with a maximum height of 100 feet. The top, at elevation of 561, will be 30 feet in width for roadway purposes, with a crest length of 2350 feet. Foundations at the site require that the dam be constructed of earth, according to Major Wyman.

The adopted cross sections will have an upstream slope of 3 horizontal to 1 vertical and downstream slope of 6 horizontal to 1 vertical. The upstream slope of the dam will be provided with stone-paving throughout. The downstream slope is provided with two berms and drainage facilities to reduce rainfall erosion.

Material excavated in the preparation of the foundation for structures will supply a large portion of that required for construction of the embankment. The balance will be obtained from the top of the terrace, east of the spillway.

bidders for the dam and power plant, have not started work on their \$35,939,450 contract. They are awaiting official "notice to proceed", which will be issued by the Washington office of the Bureau.

TWELVE STATE CONTRACTS LET AT SACRAMENTO

AMENDMENTS TO BUILDING CODE DUE FOR ACTION

Structural Steel, Concrete Home Amendments Sent To Supervisors

Director Sid J. Hester of the San Francisco Department of Public Works has concurred with Superintendent John G. Little of the Bureau of Building Inspection in approving two proposed amendments to the Building Code and today will forward the amendments to the Board of Supervisors.

One amendment would permit construction of reinforced concrete dwellings, and the other affects the physical qualities of structural steel as set forth in the existing ordinance on structural steel.

Structural Steel

The proposed amendments to the structural steel ordinance requires an ultimate tensile resistance of from 60,000 to 72,000 pounds per square inch and a yield point of at least 33,000 pounds.

The existing ordinance in Section 46, requires an ultimate tensile resistance of from 60,000 to 70,000 pounds, and a minimum yield point of 30,000 pounds.

The proposed amendment also affects Section 48, changing the stress in tension and in bending on rolled steel from 18,000 to 20,000 pounds per square inch.

Concrete Dwellings

The proposed amendment, Section 133-D, would permit dwellings of reinforced concrete, one or two stories in height, with or without basements, to be constructed with bearing or partition walls of solid monolithic reinforced concrete, or of pre-cast hollow concrete masonry units reinforced after assembly, or of various combinations thereof, subject to various requirements.

"Solid monolithic reinforced concrete bearing walls shall have a minimum thickness of six inches for one-story dwellings. For two-story dwellings the first story shall have a minimum thickness of eight inches, and the second story walls a minimum thickness of six inch-

PARISH BROS. LOW ON ELDRIDGE DAM

SACRAMENTO, July 19.—Parish Brothers, Oakland, at \$45,920, today submitted the low bid to State Architect Geo. B. McDougall for construction of a water development system, including Suttentfield Dam, at Sonoma State Home, Eldridge.

The only other bidders were M. J. Ruddy, Modesto, \$49,932.60; B. A. Howkins and Co., \$57,150.80; and R. G. Clifford, \$70,682. The contract calls for construction of a rolled earth dam together with a concrete outlet tower, a steel footbridge, a concrete spillway, piping and pumps.

HIGHWAY RESEARCH BOARD TO CONVENE

The Eighteenth Annual Meeting of the Highway Research Board will be held in the building of the National Academy of Sciences and National Research Council, 2101 Constitution avenue, Washington, D. C., on November 30-December 2, 1938, according to announcement made by Roy W. Crum, Director of the Board.

es. Basement walls shall have a minimum thickness of eight inches, and shall be of reinforced concrete."

Amendments Approved

The procedure followed by the Bureau of Building Inspection in investigating the proposed amendments was similar to that employed for the recent ceramic tile ordinance. Structural Engineer Felix H. Spitzer conducted the investigation under the supervision of Superintendent John Little, contacting all interested parties. Last week the amendments were approved by Mr. Little and forwarded to Director Sid J. Hester of the Department of Public Works.

Mr. Hester yesterday approved the amendments. They will be sent to the Board of Supervisors where they will be studied by the Building Committee under Chairman Adolph Uhl.

AGC REGIONAL CONCLAVE SET FOR AUGUST 5-6

Chapter Presidents, Managers From Western States Will Meet in S. F.

Eleven western states will be represented here when the Associated General Contractors of America, Inc., holds its regional conference of chapter presidents and managers at the Palace Hotel August 5 and 6.

The conference will be opened by National President E. P. Palmer, who with National Manager Edward J. Harding and National Vice President Guy F. Atkinson, will take an outstanding part in the two days of deliberations.

President Palmer and Manager Harding will render detailed reports of the national association's accomplishments for the contracting industry during the recently concluded session of Congress, with special reference to PWA funds and the allotment of Federal aid for highway construction.

Among the highlights of the 2-day meet will be the formulation of tentative plans for the National Convention of the Associated General Contractors of America, to be held here March 5 to March 11, 1939.

This will be one of the largest San Francisco conventions during the Exposition year and, it is anticipated, will be attended by more than 10,000 leaders in the contracting industry from every state in the Union, as well as from Hawaii, Alaska and Puerto Rico.

Details of the regional conference are being arranged under the auspices of Northern California Chapter, Associated General Contractors, according to Secretary-Manager Floyd O. Booe, who with President R. G. Clifford, of the local group, is planning the program, luncheon, dinner and other functions for the two days.

A chemical farm, with vegetables growing from huge glass jars filled with chemical solution, will be a feature of the Hall of Science at the 1939 Golden Gate International Exposition.

BONDS VOTED

SANTA PAULA. Ventura Co., Cal.—The \$125,000 bond issue to finance the new sewer system and a sewage treatment plant carried at the election July 12, by a vote of 544 to 67. The proposed work was made necessary by the destruction in the March flood of the 15-year old Imhoff tank and the plant site. Cost of the new project is estimated at \$182,520. The state has already allocated \$25,000 emergency flood funds to this work while the PWA has been asked for a 45% grant, or \$70,884 of federal funds. The balance or \$86,636, will be furnished from the proceeds of the bond issue. Harry Jenks, Berkeley, is the consulting engineer, and City Engineer S. Gerald Bennett, engineer in charge of construction of sewer lines. Mayor B. C. Hendricks has announced that bids will be advertised so that work may start Sept. 1. According to a segregated estimate the plant will cost about \$63,820, and the sewer lines \$90,150. The latter include about 6000 ft. of concrete pipe varying up to 24-in. in diam.

Application has been made to the State Board of Health for a permit to establish the plan on the lower ten acres of a 28-acre tract of land lying between Telegraph Road and Santa Clara River, the plant to be located approx. 1000 ft. southwest of Acacia Road, the effluent to be disposed of into the Santa Clara River.

The plant is described as consisting of primary and secondary detention-setting tanks; primary and secondary bio-filters; an enclosed sludge digestion tank; sludge drying bed; and chlorination for odor control and disinfection. 32

BIDS WANTED

SEATTLE, Wash.—Until August 11, 10:00 A. M., bids will be received by the Seattle Board of Public Wks., for construction of Unit 10 of Henderson St., trunk sewer project, a sewage treatment plant. Plans call for underground structures and tanks, 60-inch monolithic reinforced concrete pipe, pumping unit and chlorine treatment effluent tank.

Plans and specifications may be obtained from C. L. Wartelle, City Engineer, County-City Building, Seattle, upon the deposit of \$25.00. 32

Campbell Construction Co. Low on Colfax Overpass; Immel Bids Mendocino Grading

SACRAMENTO, July 27.—Low bids aggregating \$162,183.35 today were submitted to the State Division of Highways on two contracts calling for bridge and highway construction in Placer and Mendocino counties.

Campbell Construction Company, Sacramento, at \$117,881.70 submitted the low bid on the Placer county job, followed by M. B. McGowan, Inc., at \$123,131.

The work involves construction of a steel girder and reinforced concrete deck overhead crossing over the Southern Pacific tracks at Colfax. The bridge will consist of one 101.99-foot span; one 94-foot span; one 88.59-foot span, and one 35.75-foot span.

Complete bids follow:

Campbell Const. Co.....	\$117,881.70
M. B. McGowan, Inc.....	123,131.00
B. A. Howkins & Co.....	123,834.50

A. Telchert & Son, Inc.....	132,045.00
J. F. Knapp.....	132,450.00
John Rocca.....	135,142.00

Low bidder on the Mendocino county project was Lee J. Immel, Berkeley, at \$44,301.65. The work involves grading about 0.6 mile of highway and surfacing with road-mix surfacing and placing sacked concrete riprap, five and one-half miles east of Route one and Lake county, portions between 17 and 23 miles east of Lucerne.

Complete bids follow:

Lee J. Immel.....	\$44,301.65
E. A. Forde.....	45,832.50
Fred J. Maurer & Son, Inc.....	45,931.30
Claude C. Wood.....	46,724.25
Pacific States Const. Co.....	47,121.00
Hemstreet and Bell.....	48,095.50
N. M. Ball Sons.....	54,707.50

Principal items include: 10,700 cubic yards of unclassified roadway excavation; 2555 cubic yards sacked concrete riprap; 2400 cubic yards of structural excavation; 20,500 station yards overhaul; 1030 cubic yards of gravel base; 420 cubic yards of mineral aggregate roadmix surfacing; 39.6 tons of liquid asphalt; and 84 lineal feet of CMP.

\$129,381 LOW BID FOR VENTURA JOB

LOS ANGELES, July 21.—Macco Construction Co., Clearwater, today submitted low bid to the office of the State Highway Engineer here for grading and surfacing with asphalt concrete about four miles in Ventura county. Amount of the low proposal was \$129,381.

Among major bidding items were 86,000 cubic yards roadway excavation; 840,000 station yards overhaul; and 19,950 tons of asphalt concrete surfacing. The project is located between Fillmore and Hopper Creek in Ventura Co.

Funds Allotted L. A. Quarantine Station

Public Works Administrator H. L. Ickes has announced Presidential approval of three PWA Federal projects for the Public Health Service, Treasury Department, with total allocations amounting to \$290,000.

The three PWA projects for the Public Health Service consist of the construction of one combination garage-storage shops and parrot detention building plus additional landscaping under a \$60,000 allotment at the Los Angeles quarantine station; construction of quarters for nine medical officers at the Rosebank quarantine station, New York, through a PWA allotment of \$160,000; and the demolition of lighthouse keeper's old house and the construction and equipping of one double set of officers' quarters and garage at the Detroit, Michigan, Marine Hospital under a \$70,000 PWA allotment.

IMMEL SUBMITS LOW FIGURE ON AIRPORT WORK

Berkeley Bidder Low at \$97,430; Blomquist Second At \$104,794

Seven firms yesterday submitted bids ranging from \$97,430 to \$117,410 to the Public Utilities Commission for widening and extending existing runways at San Francisco Municipal Airport.

Lee J. Immel, Berkeley, at \$97,430, submitted the low proposal, followed by A. N. Blomquist, Redwood City, at \$104,794.

The project is one of the first in the \$2,850,000 airport improvement program for which bonds were voted last November.

Complete bids follow:

Lee J. Immel.....	\$97,430
A. N. Blomquist.....	104,794
J. A. Casson.....	111,310
Union Paving Company.....	111,420
Oilfields Trucking Co.....	115,290
Eaton and Smith.....	115,710
Charles L. Harney.....	117,410

The contract calls for 963,000 gallons of emulsified asphalt of various types for improving the existing runways at San Francisco Airport. The runways will be widened and extended. In addition a taxi space will be constructed.

The work involves: 320,000 gallons of emulsified asphalt, in place in a asphalt stabilized pavement base; 430,000 gallons of emulsified asphalt, in place, in asphaltic concrete wearing surface; 180,000 gallons of emulsified asphalt, in place, in asphaltic concrete fill under wearing surface; 60,000 gallons of emulsified asphalt, in place, in seal coat and penetration a sphaltic treatment; and 3000 gals. of emulsified asphalt delivered in storage.

Start Work Soon

Work will be started on the project as soon as possible, it is understood, due to the danger of rain delaying the work during the late months of the year.

New orders for fabricated steel plate taken during May, 1938, amounted to 25,141 short tons, as compared to orders for 28,913 short tons taken during May, 1937, the Bureau of Census reports.

EXHIBIT BLDGS.

YERBA BUENA ISLAND, Site of the 1939 World's Fair.

Construction Redwood Empire Bldg. and Sacramento Valley and Mountain Counties Bldg.
Owner—State of California Commission for the Golden Gate International Exposition, (C. H. Purcell, Executive Officer).

Architect—State Division of Architecture, (George E. McDougall, State Architect; Timothy Pfleger, Supervising Architect).

Buildings are to be of wood frame construction with wood sills, joists and floors.

The Redwood Empire Building is an "L"-shaped structure. The central portion is two-story construction approximately 80-ft. square with two single story wings, 85-ft. long and 145-ft. long, respectively, with a width of about 45-ft. The exterior finish will be partly plywood and partly ornamental redwood sheathing. The roof will be a combination shake and prepared roofing. Wood sash will be used and all framing and finish woodwork will be redwood.

The Sacramento Valley and Mountain Counties Building in floor plan consists of a circular segment about 150-ft. long by 35-ft. wide, with a circular structure at one end having a diameter of 70-ft. The building in general is single story construction. Adjoining this on the inner side of the segment is a wood frame balcony 13-ft. in width, with timber supporting columns, wood floors, and a canvas deck or roof covering. Wood sash will be used and the exterior finish will be partly plywood and partly corrugated iron. The roof will be prepared roofing.

The circular portion of the building has a mezzanine floor, 13-ft. in

width, with the central portion lighted by a skylight 30-ft. in diameter. A central pipe column supports the skylight but all other columns are wood. In general, this building is constructed of Douglas fir.

Certain offices and toilet spaces in both buildings will have the interior finish included, but in general, the interior finish is not a part of this contract.

Plumbing and electrical work for both buildings will be included as a part of this contract.

Plans and specifications may be obtained at the office of the California Commission for the Golden Gate International Exposition, 660 Market St., San Francisco, upon deposit of \$25, returnable, and may be seen at the office of the State Architect, Public Works Bldg., 12th and N Sts., Sacramento, and at the offices of the Builders' Exchange in San Francisco and in Oakland.

Bids, which must be accompanied by cash, a cashier's check or certified check payable to the Director of Public Works in the amount of 1% of bid, will be received by the Department of Public Works at the office of the California Commission for the Golden Gate International Exposition, Room 411, Pacific Mutual Life Insurance Bldg., 660 Market St., San Francisco, and publicly opened and ready in Room 415 of said bldg. 13

STRONA SUBMITS LOWEST BID ON SPADRA PROJ.

Bids \$158,190 for Pacific Colony Nursery Ward; New Jobs Advertised

SACRAMENTO, Aug. 9.—State Architect George B. McDougall today called for bids on two projects and opened proposals for construction of a nursery ward building at Pacific Colony, and for electrical work at California Polytechnic School, San Luis Obispo.

John Strona, Pomona, at \$158,190, submitted the low bid for general construction of the nursery ward building at Pacific Colony. The contract calls for construction of a one- and two-story reinforced concrete ward building with hollow tile partitions, steel sash and clay tile roof covering.

Bids were taken under the following propositions: general; electric; plumbing; and heating and ventilating.

Other low bids were as follows: Travers Riddle, Inc., \$13,290.00 (plumbing); Vancott Co., \$5,842 (electric); and Hickman Brothers \$10,812 (heating and ventilating).

Baruch Corporation at \$159,783, submitted the second lowest bid on the contract for general construction. Other bidders were; Harvey A. Nichols, \$163,474; Jas. I. Barnes \$172,300, and W. E. Allen, \$180,000.

Only three firms submitted bids on the contract for electric work at California Polytechnic School in San Luis Obispo.

Allen R. Ochs, San Luis Obispo, at \$1492, submitted the low proposal, followed by Collins Electric Company, at \$1613. The only other bidder was California Electric Company at \$1652.

Bids will be opened September 6 in Sacramento for construction of Unit Fifteen and two custodial buildings at Pacific Colony, Spadra.

Each building will be a one-story reinforced concrete structure. Specifications call for hollow tile partitions, steel sash and clay tile roof covering.

Bids will be taken under the following propositions: (1) general work; (2) heating and ventilating work; (3) plumbing work; and (4)

AWARD ON HANSEN DAM RECOMMENDED

Award of the contract for construction of Hansen Dam to Guy F. Atkinson Co., San Francisco, was recommended yesterday by the U. S. Engineer Office at Los Angeles. The San Francisco contractor Monday submitted a low bid of \$5,688,419 for the contract, underbidding six competing firms.

The dam will be an earthfill structure 9050 feet in length, with a maximum height of 100 feet. Located in Los Angeles about one and four-tenths mi. northeast of San Fernando road, the dam is an important part of the Southern California flood control system. It will impound about 36,000 acre-feet at spillway elevation.

electric work.

State Architect George B. McDougall also called for bids, to be opened August 16, for construction of a truck shed and supply building for the California National Guard in Sacramento.

Plumbing bids on the ward bldg. at Pacific Colony, for which bids were opened today, included: Kenneth Fraser, \$13,452; O. E. Ross, \$15,187; Munger & Munger, \$15,281; Younger & Fellows, Ltd., \$15,382; and Hickman Bros., \$14,142.

Additional bids on the heating and ventilating contract were: Travers Riddle, \$11,378; Consolidated Heating and Ventilating Co., \$11,596; Kenneth Fraser \$12,430; Munger & Munger, \$12,932; O. E. Ross, \$13,623; and Younger & Fellows, \$15,082.

CITY INVITES PROPOSALS ON SIX PROJECTS

Heating Equipment, Main Contract, Other Work Out For Bids

Bids on six minor city contracts yesterday were called by the San Francisco Department of Public Works and the Public Utilities Commission.

Heading the list of projects for which bids were called yesterday is the contract for heating equipment for the classroom building of the High School of Commerce at Franklin and Fell streets. Bids will be opened August 24.

Plans and specifications for the job were prepared under the direction of City Architect Charles H. Sawyer who estimates the work to cost \$18,000.

Informal bids will be opened August 17 by the Department of Public Works on four contracts.

The first calls for cleaning the roof of Portola Junior High School. Following improvement of the roof, the contractor will cover the surface with three layers of felt and gravel.

Plans and specifications on the three remaining jobs were prepared under the direction of City Engineer John J. Casey.

The largest of the contracts involves removing sand from the roadway and sidewalk of Kirkham street between Thirty-seventh and Thirty-ninth avenues. The estimated cost is \$990, according to Mr. Casey.

Removing slide material on Mangels street between Genessee and Foerster streets is called for in another contract. The work will cost approximately \$850. The final Department of Public Works project involves installation of four side-sewers in Anza street, between Forty-seventh and Forty-eighth avenues, at an estimated cost of \$756.50.

The Public Utilities Commission will open bids August 19 for laying 6- and 8-inch cast iron water mains in Athens street between Foote and Cayuga avenues. About 1256 lineal feet of pipe are involved.

Levee Project Bids Opening September 7

Bids for raising and strengthening more than three miles of levee near Yuba City were invited this week by the U. S. Engineer Office in Sacramento. Proposals will be opened September 7.

The project is located along the west levee of the Feather River in the vicinity of Yuba City, and involves placing approximately 821,500 cubic yards of earth in embankment.

Contra Costa Underpasses, Three Grading, Surfacing Jobs Advertised; Bids Sept. 7

SACRAMENTO, August 16.—Four State Division of Highways contracts involving construction in five Northern California counties were authorized for advertising here today by the State Highway Commission.

Bids on all four jobs will be opened in Sacramento September 7, it was announced.

The projects which went out for bids today are located by counties as follows:

Contra Costa County: construction of two underpasses and paving about fifteen hundredths of a mile. One undergrade crossing will pass below the tracks of the Sacramento Northern Railway, the other under a county road. The underpasses are located at Ohmer Station. The short stretch of pavement will be Portland cement concrete.

Sonoma Surfacing

Sonoma County: grading, applying road-mix surface treatment and installing culverts on approximately eight-tenths of a mile of State highway. The work is located between Boiler Gulch and Miller Creek.

Humboldt County: grading and surfacing with road-mix surfacing on approximately four-tenths of a mile, between Benbow and one mile north of Dean Creek.

Nevada and Placer Cos.: seven separate sections of construction, covering a total of about nine-tenths of a mile, between Indian Springs and one mile east of Rainbow Tavern. Work to be done under the contract includes grading and applying road-mix surfacing to about three-tenths of a mile, and constructing channel changes and riprap work.

BUILDERS EXCHANGE NAMES NEW MEMBERS

Election of the following firms to membership recently is announced by the San Francisco Builders' Exchange; Edwin L. Ellingson, general contractor, 355 Fulton street; LaChapelle (Frank Helwig, owner) plumbing and heating, 3459 Mission street; and the J. Philip Murphy Corp., reinforcing steel erection, 3901 Mission street.

BIDS SEPT. 6 ON SAN LUIS DORMITORIES

SACRAMENTO, Aug. 16.—Bids for construction of six dormitory units at California Polytechnic School in San Luis Obispo were invited here today by State Architect George B. McDougall.

Proposals on the three contracts covering the work will be opened in Sacramento September 6, Mr. McDougall announced.

Segregated bids will be taken for:

1. General Work, combined for all six buildings.
2. Plumbing and heating work, combined for all six buildings.
3. Electrical work, combined for all six buildings.

The dormitory units will be one-story frame buildings. They will have exterior wall covering of wood siding and composition shingles for roofing. Interior walls and ceilings will be plastered. Windows and doors will be of wood.

Contractors desiring to figure the work may obtain plans and specifications from the State Architect's office upon deposit of \$25, returnable.

Mr. McDougall opened bids here today for alterations to office and committee rooms in the State Capitol building.

Low bidder for general work was H. W. Robertson, 3004 "F" street, Sacramento, with a proposal of \$5,729. Lawrence Construction Co., at \$5,966 submitted second low bid.

M. R. Carpenter, 907 Front St., Sacramento, at \$4,401, was low bidder for air conditioning. Luppen & Hawley, Inc., 3136 "J" street, Sacramento, submitted a low bid of \$1,914 for electric wiring.

 - (a) 2,171 c.y. excav.;
 - (b) 30 tons reinf. steel;
 - (c) 7,600 sq. ft. wire mesh reinf.;
 - (d) 222 c.y. class A conc.;
 - (e) 159 c.y. class B conc.;
 - (f) 12,400 sq. ft. form surface;
 - (g) 11,500 bd. ft. rf. lbr.;
 - (h) Misc. pipe, fittings, etc.

- UNIT No. 2: Buena Vista Reservoir, 80 ft. diam., 23 ft. high, circular reinf. conc., 850,000 gals. capacity.
 - (a) 3,068 c.y. excav.;
 - (b) 30 tons reinf. steel;
 - (c) 7,600 sq. ft. wire mesh reinf.;
 - (d) 222 c.y. class B conc.;
 - (e) 159 c.y. class B conc.;
 - (f) 12,400 sq. ft. form surface;
 - (g) 11,500 bd. ft. roof. lbr.;
 - (h) Misc. pipe, fittings, etc.

UNIT No. 3: Harnish Reservoir,

- 80 ft. diam., 23 ft. high, circular reinf. conc., 850,000 gals. capacity.
 - (a) 5,278 c.y. excav.;
 - (b) 30 tons reinf. steel;
 - (c) 7,600 sq. ft. wire mesh reinf.;
 - (d) 222 c.y. class A conc.;
 - (e) 159 c.y. class B conc.;
 - (f) 12,400 sq. ft. form surface;
 - (g) 11,500 bd. ft. roof. lbr.;
 - (h) Misc. pipe, fittings, etc.

UNIT No. 4: Baring Reservoir, a dirt reservoir with Gunite lining and conc. flr., about 1,000,000 gals capacity.

- (a) 1,200 lf. of graded road;
- (b) 5,300 c.y. excav.;
- (c) 1,660 c.y. fill;
- (d) 150 c.y. class A conc.;
- (e) 15,500 sq. ft. 2-in. Gunite lining;
- (f) 350 lbs. reinf. steel;
- (g) 23,000 sq. ft. wire reinf. mesh;
- (h) 35,000 bd. ft. roof. lbr.;
- (i) Misc. pipe, copper water stops, roofing paper, etc.

Note: The district will furnish valves.

A lump sum bid will be submitted on each of the four units. * 30

- (53) 4 only 8-in. automatic drainage gates;
- (54) lump sum, insulating exhaust pipe from gasoline-iec. generator set;
- (55) lump sum, control house superstructure.

The Prado Retarding Basin will involve an earth-fill dam, having an impervious core, with a maximum height of 100 ft. The top, at elevation 561, is 30 ft. in width for roadway purposes, with a crest length of 2,350 ft. Foundations at the site require that the dam be constructed of earth. The adopted cross-sections will have an upstream slope of 3 horizontal to 1 vertical and downstream slope of 6 horizontal to 1 vertical. The upstream slope of the dam will be provided with rock-paving throughout. The downstream slope is provided with two berms and drainage facilities to reduce rainfall erosion.

Material excavated in the preparation of the foundation for structures will supply a large portion of that required for construction of the embankment of the dam. Additional material required for the impervious core will be obtained from the top of the terrace, east of the spillway. The outlet works, consisting of control tower, trash racks and conduits, are located in the left abutment and are founded on a sandstone formation with intake at elevation 464. Foundations of the reservoir there are provided 4x8-ft. openings and two 7x12-ft. openings, all equipped with control gates except one 4x8-ft. opening which is designed as a conservation outlet, to pass the normal flow without interruption. Manually operated electrically driven hoists are provided for the operation of these gates. Controlled flows in accordance with requirements for flushing of the spreading grounds, can be released which will assure the maximum rate of absorption at all times along the present stream channel.

The spillway, designed with ogee control, is located through the ridge forming the left abutment. Plans call for lining the spillway channel with a concrete slab. It will have a width of 1000 feet at the crest, elevation 536, and will taper to a width of 600 feet at an elevation 460. The spillway will have a capacity of 190,000 second feet. * 30

Carl N. Swenson Low on Sonoma Cottages At \$192,500; Moore & Roberts Second

SACRAMENTO, August 23.—Bids on contracts covering construction of cottages at Sonoma State Home were opened here today and three new contracts were ordered advertised by State Architect George B. McDougall.

Low bidder for general work on the Eldridge cottages was Carl N. Swenson Co., San Jose, at \$192,500. Moore & Roberts, San Francisco submitted a second low proposal of \$194,900. Other general bidders were Azevedo Construction Co., Sacramento, at \$195,492 and Campbell Construction Co., Sacramento, at \$197,545.

Plumbing Contract

Scott Company of San Francisco was low bidder at \$24,137 for the plumbing work.

Other bidders on plumbing were: M. R. Carpenter, Sacramento, \$24,483; Skelly & Kohler, San Francisco, \$24,580; and James A. Nelson, Inc., San Francisco, \$25,326.

Lowest heating and ventilating bid was \$27,300, submitted by Alta Electrical & Mechanical Co., San Francisco.

Second and third low bidders on heating were Skelly & Kohler, at \$32,939, and James A. Nelson, at \$30,988.

Other heating bidders were: M. R. Carpenter, \$31,821; Scott Co., \$32,343; and Pacific Heating and Ventilating Co., \$32,749.

Electrical Work

Alta Electric & Mechanical Co. also submitted low bid on electrical work at \$7,939. Collins Electric Co. Stockton, was second at \$8,615. Only other electrical bid was from Norman A. Russell, Santa Rosa, at \$10,658.

Bids will be opened here September 13 on three new contracts, Mr. McDougall announced today.

One calls for construction of additions and alterations to the equipment repair shops of the State Division of Highways at Bishop, Inyo county.

The second involves construction of a boiler house, gas and oil station and truck shed for the Division of Highways at Conway Summit, Mono county. They will be one-story frame buildings with corrugated iron walls and roof and

Low Bids Aggregate \$247,217 on Four State Bridge and Highway Contracts

SACRAMENTO, August 31—The State Division of Highways today received low bids aggregating \$247,217 on four bridge and highway construction jobs in Lake, Placer, Sierra and Humboldt Counties.

Paul J. Tyler, Oroville, at \$99,666, submitted the only bid on the largest contract for which bids were opened by the State Division of Highways today.

Steel Span

The work involves construction of one 120-foot steel truss span on concrete piers, and two 49-foot girder spans on concrete bents across the North Fork of the Yuba River at Downieville in Sierra County.

Approximately 0.5 miles of grading and surfacing with untreated crushed gravel and applying seal coat are involved also.

Bids on the contract were first called for August 17. However, the bid opening date was postponed at that time until today.

J. L. Connor and Sons, Monterey, at \$69,456.50, under bid six competing firms on the second largest contract for which bids were opened today. The work involves about 2.1 miles of grading and surfacing with untreated crushed gravel and applying seal coat. The stretch to be improved lies between Le Trianon and Scotts Valley Road in Lake County.

Complete bids follow:

SHASTA RAIL BIDS TO OPEN SEPT. 21

Postponement of the bid opening date for construction of the 14-mile section of the Southern Pacific railway relocation around the site of Shasta Reservoir from September 19 to September 21 is announced by the Bureau of Reclamation.

Bids will be opened at 10 A. M., September 21, in the Old Post Office in Sacramento. The contract calls for construction of earthwork, tunnels, and structures for the railroad relocation from milepost 258.63 to milepost 272.68, near Redding Bids for the long low bridge in the vicinity of Redding, first portion of the relocation project, were opened last month.

NEW OFFICES TAKEN BY PACIFIC MFG. CO.

The Pacific Manufacturing Company announces the new location of their offices at 142 Sansome street, the fifth floor. The Company was formerly located at 454 Montgomery street.

The change of address will become effective on and after September 1, it is announced. The telephone number is GARfield 7755.

Bridge Creek Job

E. E. Smith, Eureka, at \$31,604, submitted the low bid for construction of reinforced concrete slab and girder bridge across Bridge Creek about 19 miles north of Garberville in Humboldt County. The only other bidder was Robert McCarthy, at \$39,658.

The bridge will consist of five 24-foot spans on concrete pile bents with spread footings. About fifteen one hundredths of a mile of grading is called for also under the contract.

S. F. FIRM LOW FOR HOSPITAL WING CONTRACT

Moore & Roberts Bid \$89,700 On Agnew Hydrotherapy Additions

SACRAMENTO, August 31 — State Architect George B. McDougall today opened bids for construction of two hydrotherapy wings at the Agnew State Hospital.

Moore and Roberts, San Francisco, at \$89,700, submitted the low bid on the general contract, followed by K. E. Parker Company, at \$91,900.

Other Bidders

Other bidders on the general contract were B. A. Howkins Company, at \$94,813; and Trewitt - Shields and Fisher, at \$96,500.

Bids on the job were taken as follows: (1) general work, (2) electrical work (3) plumbing; and (4) heating and ventilating.

The two hydrotherapy wings will be additions to the existing receiving buildings, and will be two stories in height of reinforced concrete construction. Specifications call for hollow tile partitions, steel sash; and tile roofs.

The total combined area of the two wings will be approximately 14,000 square feet, according to Mr. McDougall.

Gulbert Bros. Electric Company, San Jose, at \$5,726, submitted the low bid on the electrical contract, followed by Alta Electric and Mechanical, at \$6,130.

A. J. Peters and Son, at \$15, 909, was low bidder on the plumbing contract, with William F. Serpa, at \$16,147, second low.

O'Mara and Stewart, Ltd., at \$11,719, were the low bidders for the heating and ventilating work, followed by Pacific Heating and Ventilating Company, at \$11,725.

STATE APPORTIONS S. F. VEHICLE FUNDS

Apportionment of motor vehicle fees to cities for the second quarter of 1938, announced today by the Department of Motor Vehicles through the office of Governor Frank F. Merriam, show San Francisco will receive \$22,609.83.

BIDS SEPT. 16 FOR S. F. BLDG. INTERIOR WORK

S. F. Works Department Calls Bids for \$85,000 Fair Contract

The San Francisco Department of Public Works yesterday called for bids for general construction, plumbing, heating and ventilating and electric work for the interior of the San Francisco Building on Yerba Buena Shoals.

Bids on the job will be opened September 16.

The contract for construction of the building was awarded to C. L. Wold Construction Company, at \$77,238, recently.

The San Francisco Building is a two-story frame structure with approximately 40,000 square feet of floor area, surrounding a two-story, 40-foot inner court. There will be a fountain on the first floor and a grand stairway approximately 40 feet high and 18 feet across.

General Construction

The estimated cost of general construction of interior work is \$65,000, according to City Architect Charles H. Sawyer. The electrical work is estimated to cost \$10,500; and the plumbing, heating and ventilating, \$9,700.

Eaton and Smith, at \$10,125.50, yesterday submitted the low bid to the Department for improving Athens Street, between Excelsior Avenue. Other bidders were: West Construction Company, at \$11,119.75, and Charles L. Harney, at \$11,291.15.

CONSTRUCTION OF SHASTA DAM TO START SOON

**Pacific Constructors Receive
Notice to Proceed With
Work**

Pacific Constructors, Inc., yesterday was speeding preliminary work at the Shasta Dam site following issuance of the official notice to proceed with construction of the \$35,939,450 project.

Walker R. Young, supervising engineer of the Central Valley Project, directed the required notice to Pacific Constructors, Inc., 12-company syndicate which was awarded the main dam contract for \$35,939,450 by Secretary of the Interior Harold L. Ickes a few weeks ago.

The order requires Pacific Constructors to start work within 30 days after receipt of the notice, but permits the contractor to start immediately, which it is expected will be done. The contractor already has opened a field office in Redding, and has employed about 140 men in preliminary building of access roads and clearing of the contractor's construction camp site in the Sacramento River Canyon below the dam site.

Shasta Dam

Shasta Dam was designed and is being constructed by the Bureau of Reclamation. A call for bids for the main contract was issued April 1, and Pacific Constructors' bid was the lower of two received by the Bureau at its Sacramento office June 1. Each bid was accompanied by a guarantee bond in the sum of \$2,000,000. Since the award of contract in July, the successful bidder has posted in addition a performance bond of \$5,000,000 to assure performance of the contract, and a payment bond of \$2,500,000 to assure payment of labor and material bills. The required bonds are among the largest on record.

The Federal Government has obtained from the State of California an assignment of the State's rights to use of water of the Sacramento River, as required for the Central Valley Project.

Page Returns

Commissioner of Reclamation John C. Page, who was here last week for Central Valley Project conferences, left Saturday night for Washington, D. C.

The general contract upon which construction is ordered to start is for performing all work, including furnishing labor and equipment, for building the dam and power under supervision of Bureau of Reclamation engineers. The contract does not include the supplying of materials which are to become a part of the completed structure. The Government will purchase under separate contracts such items as cement, structural and reinforcement steel, pipe, metal work and machinery.

Under the contract the employment of labor will be arranged by

KELLY AWARDS 3 ROAD CONTRACTS

Three contracts aggregating \$259,675 yesterday were awarded by State Director Earl Lee Kelly of the Department of Public Works.

The largest contract, for grading and applying road-mix surface treatment to 2.6 miles of highway between Boulder Park and Mountain Springs in San Diego County, was awarded to A. S. Vinnell Company, at \$237,962. To the Griffith Company, at \$18,535, went the contract for constructing 2.9 miles of protection fence in Los Angeles County; and to Al W. Simmonds, at \$3178, went the contract for 663 miles of traffic stripe in various counties.

TRIANGLE, BELL LOW ON WAWONA SURFACING JOB

**Triangle Rock & Gravel, Bell
Bid \$270,244 on Bureau
Contract**

Bids ranging from \$270,244 to \$464,498.40 yesterday were submitted to the U. S. Bureau of Public Roads for approximately 30.823 miles of bituminous treated surfacing in Mariposa County.

The Triangle Rock and Gravel Company and Ralph A. Bell, San Bernardino, at \$270,244, submitted the low bid on the job.

The second lowest bidder was Louis Biasotti and Son, at \$283,819.50, followed by Union Paving Company, at \$366,517.25.

Total Bids

Complete total bids follow:

Triangle Rock & Gravel	\$270,244.00
Co. & Ralph A. Bell	\$270,244.00
Louis Biasotti & Son.....	283,819.50
Union Paving Company..	366,517.25
Hanrahan Company.....	436,186.50
Gibbons and Reed Co.....	464,498.40

The contract calls for placing a bituminous treated surfacing on approximately 30.823 miles of Section A1, A2 and A3 of Route 5, Wawona Road-Glacier Point in Yosemite National Park, Mariposa County.

the contractor. The Government has specified minimum rates of wages.

The dam will create a reservoir with a gross storage capacity of 4,500,000 acre-feet, storing waters of the Sacramento, Pit and McCloud Rivers. The reservoir will be operated for purposes of navigation improvement and flood control in the Sacramento Valley, irrigation in both the Sacramento and San Joaquin Valleys, salinity repulsion in the Sacramento-San Joaquin Delta, and electric power generation for Northern California.

J. STRONA, OCHS LOW ON STATE BUILDING JOBS

**John Strona Bids \$247,800 on
Pacific Colony Custodial
Buildings**

SACRAMENTO, September 6—State Architect George B. McDougall today opened bids on two contracts for construction of two reinforced concrete custodial buildings at Pacific Colony, Spadra, and six dormitory units at California Polytechnic School, San Luis Obispo.

John Strona, at \$247,800, submitted the low bid for general construction of the custodial buildings, followed by Baruch Corporation, at \$257,377, and Harvey A. Nichols, at \$240,794.

Low bidders on the other propositions were: Kenneth Fraser, at \$17,944, heating and ventilating; Kenneth Fraser, \$21,882, plumbing; and Moore Electric Company, at \$9,186, electric work.

The contract calls for construction of two one-story reinforced concrete custodial buildings at Pacific Colony with hollow tile partitions, steel sash, and clay tile roof covering.

Six Dormitories

O. R. Ochs, San Luis Obispo, at \$27,400, submitted the low bid for construction of six dormitory units at California Polytechnic School in San Luis Obispo. The dormitories will be one-story frame structures.

Other bidders on the general work contract were: Theo. M. Maino, \$29,210; F. C. Stolte Co., \$29,675; Empire Construction Co., \$29,770; and B. A. Howkins and Co., \$32,862.

Smee Plumbing and Heating Company, at \$4,295, and Moore Elevator Company, at \$2,636, were low on the plumbing and heating, and elevator work, respectively.

IDEAL ANNOUNCES ELECTRIC MARKER

A new tool for marking positive, permanent identification is the Ideal Electric Marker, manufactured by the Ideal Commutator Dresser Company, 4065 Park Avenue, Sycamore, Illinois.

The marker cuts owner's name, sizes, numbers, models and other information on steel, iron, bronze glass, bakelite, ceramics, composition and other surfaces, according to the manufacturer. It operates at a speed of 7200 cutting strokes a minute, cutting into the surface of the material and leaving a clear, legible imprint. A special innovation is the Diamond Point which permits marking extra hard materials up to 60 Rockwell hardness it is said.

New orders for steel boilers during July, 1938, amounted to 888 units, as compared to 700 steel boiler orders taken during June, 1938, the Bureau of Census reports

Bids Sept. 30 For Construction of Eight Mile Addition of Contra Costa Canal

Bids for construction of an additional eight miles of the Contra Costa Canal yesterday were called for September 30 by the U. S. Bureau of Reclamation, Walker R. Young, supervising engineer, announces....

The first contract for excavation of the initial section—a four mile earth pitch from Rock Slough to near Oakley—is now completed and work is under way on the next section comprising eight miles of the canal, Mr. Young said.

The contract being advertised is for a concrete-lined section extending from a point 2 miles south of Antioch to a point 3½ miles west of Pittsburg and will involve the excavation of about 650,000 cubic yards of earth and rock, and construction of four reinforced concrete siphons, seven highway bridges and other appurtenant structures. The successful bidder will be given 450 calendar days to complete the contract after receipt of the Government's official notice to proceed with the work.

Concrete Lining

This part of the canal will be approximately 23 feet wide at the water surface, 7 feet wide at the bottom, and will carry water about 3½ feet deep. The concrete lining will be three inches thick.

The Government has already awarded a \$79,000 contract for manufacture and delivery of 16 motor-driven pumps for four pumping plants near Oakley, and will provide for their installation at a later date.

Principal items in the latest Central Valley Project contract to be placed on the market, include: 35,000 cubic yards of excavation for canal and wasteway; 148,000 station yards overhaul; 62,000 cubic yards compacting embankments; 12,800 cubic yards of excavation for structures; 139,700 sq. yards of trimming of foundations or concrete lining; 35,500 cubic yards backfill; 4400 cubic yards of concrete in structures; 11,550 cubic yards of concrete in canal lining; placing 1,290,000 pounds of reinforcement bars; and erecting 54 M fbm of timber in bridges.

Canal Capacity

The initial capacity of the Contra Costa Canal is to be 350 cubic feet per second, successively diminishing along its 46-mile course in accordance with the amounts of water to be taken out at various delivery points. Mr. Young said that the canal capacity of the section now being advertised will diminish throughout its length from 291 to 256 cubic feet per second.

The Contra Costa Canal will afford a supply of fresh water for industrial use in manufacturing and processing plants along the south shore of Suisun Bay, for agricultural use in an upland area of orchards and field crops, and for domestic use in several Contra Costa County municipalities.

The eight mile stretch of canal for which bids were called yesterday

FRANK CO. LOW ON DREDGING PROJECT

The Frank Contracting Company, San Francisco, at \$286,922.93, yesterday submitted the low bid to the U. S. Engineer Office for dredging about 2,185,247 cubic yards of material in Humboldt Bay. The unit price submitted was \$0.1313, with an alternate of \$0.119 if funds were available for the entire job.

The Hydraulic Dredging Company, at \$355,102.64, submitted the second lowest bid, followed by the S. F. Bridge Company, at \$382,419.23. The engineer's estimate was \$0.12497 per cubic yard—a total of \$273,103.

U. C. Extension Plans Engineering Course

The University of California Extension Division announces that courses in Reinforced Concrete and Air Conditioning will be given at 540 Powell Street this fall.

Mr. Victor E. Johnson will conduct the courses in Reinforced Concrete. Course 860A will stress application of theory, practical designing and detailing. It will begin September 19 at 7 P. M. Course 861, Design and Formwork, will open on the same evening at 8 P. M. The same courses will be given at 1730 Franklin Street, Oakland, September 23, at 7:00 and 8:00 P. M.

Mr. F. W. Hutchinson, Air Conditioning Consultant, will conduct the classes in Air Conditioning, which will open on September 16, at 7:30 P. M. In Oakland, (1730 Franklin Street) Mr. Hutchinson will give the same course September 14 at 8:00 P. M.

The first meeting of any of these classes will be open without charge to those interested.

day will be commenced within thirty days after the notice to proceed has been given and completed within 450 calendar days, it is announced.

Bids on the contract will be opened at 10:00 A. M., September 30, in the Old Post Office Building, Sacramento.

AISC HONORS GOLDEN GATE SPAN SEPT. 14

Mrs. A. Strauss to Unveil Plaque for 1937 Bridge Award

New honors will be accorded the Golden Gate Bridge next Wednesday, when a stainless steel plaque is unveiled by Mrs. Annette Strauss, widow of Joseph E. Strauss, marking the span as the most beautiful steel bridge construction in 1937.

The plaque was awarded to the Golden Gate Bridge by the American Institute of Steel Construction. Announcement of the award was made at a banquet of the committee of judges of the institute at the Engineers' Club, New York, June 23. Director William D. Hadeler, of San Francisco, attended as representative of the Golden Gate Bridge and Highway District.

Unveiling ceremonies will take place at the toll plaza at Fort Point at 11:30 A. M. Formal presentation of the plaque will be made by F. H. Frankland, chief engineer of the American Institute of Steel Construction, who is coming here especially for the occasion.

Annual Award

The annual award of the American Institute of Steel Construction for the most beautiful steel bridge was inaugurated in 1928. The Golden Gate Bridge is the first bridge on the Pacific Coast to win the first place, class A award. In 1936 the west crossing of the San Francisco-Oakland Bay Bridge received honorable mention in this division, while first place was awarded East River crossing of the Triborough Bridge at New York.

Participants in next Wednesday's ceremonial will include directors and officials of the Golden Gate Bridge and Highway District, in addition to several hundred invited guests from the six counties of the district, state officials, officials of the city and county of San Francisco and officers of the United States Army and Navy.

NEW LAMP ISSUED BY WESTINGHOUSE

A new type of Mazda lamp which includes a reflector inside the bulb is announced by the Westinghouse Lamp Division of the Westinghouse Electric & Manufacturing Company, Bloomfield, New Jersey.

These new lamps are made with a flared bulb, coated on the inside of the flare with metal, which takes and retains a high polish and directs the light of the filament in a powerful beam of light. The efficiency of the directed light is high because the reflector has the accurate shape of a modified paraboloid and the filament is precisely positioned with relation to the focal point of its reflector, according to the manufacturer.

Rossi Requests Suspension of \$53,000,000 PWA Application for Electrical System

Official request for suspension by San Francisco of its application for a PWA grant in connection with the proposed electrical distribution system, costing approximately \$53,000,000, is expected to place this city in line for prompt approval of other PWA requests on various projects totaling more than \$13,000,000. This was pointed out by Frederick H. Meyer, Chairman of the San Francisco Recovery Bond Committee.

Suspension of the application for the electrical distribution system grant was embodied in a letter from Mayor Angelo J. Rossi to Kenneth A. Godwin, Regional Director of the Federal Administration of Public Works, a copy of which was directed to Chairman Meyer.

Charter Amendment

In requesting suspension of this project, the Mayor stated that while it is the city's intention to finance this project through the issuance of revenue bonds, a charter amendment will be required before such bonds may be issued. He stated that such an amendment will be submitted to the people at the general election on November 8.

Even though adopted, the Mayor said, the amendment would have to be approved by the State Legislature, which would mean that it would be the middle of next January before the city could avail itself of the privileges of the amendment.

"Hence," he stated, "I suggest that the application for the financing of our electrical distribution system be suspended until such a time as it may be renewed after our charter revenue bond amendment is approved."

PWA Grants

Applications of the city for PWA grants now on file are divided into two distinct groups. The first group calls for the passage of a bond issue of \$13,178,000 at the special election of September 27. This is exclusive of the proposed Market Street Railway purchase.

The second group comprises five projects for which the city actually has funds available at this time and on which work can commence the moment PWA approval is received. This group would provide approximately \$10,000,000 in construction work and employment relief immediately.

Application on the Market Street Railway purchase project has just been filed with the Regional Office of PWA. It embodies a grant of \$5,474,700 out of a total estimated \$24,480,000.

Withdraw Dockets

Meanwhile appropriate action has been taken by the city for withdrawal of several dockets, with which it would be unable to proceed. These include the rapid transit subway system, involving \$21,410,000; the proposed bridge terminal pedestrian way, in which \$1,000,000 is involved, and an additional \$500,000 for the proposed

September 16 bids will be opened for construction of the pile foundation for the Auditorium Building, the California Commission of the Golden Gate International Exposition announced this week.

Bids will be called shortly, it is expected, for general construction of the building in order that work may be synchronized under various contracts.

The Auditorium to be constructed on Treasure Island will be one and two-story structure of octagon shape with a central steel portion. The outer structures will be of timber construction with a cement plaster finish.

The building will be about 200 by 300 feet, while the central steel portion will measure about 190 feet in diameter.
